# Together, we can create a world-class skills economy

What a week we have had in Greater Manchester! There is nothing quite like the buzz of watching the UK's most

talented students and apprentices demonstrate their aptitude, determination and confidence as they compete to be named the UK's best in their chosen industry.

From the 6,000 young people who registered to the 442 who made it through to the finals, it is brilliant to see representation from across England, Scotland, Wales and Northern Ireland. And what a great honour to be able to announce the winners and celebrate their fantastic achievements.

Mayor Andy Burnham's ambition to transform Greater Manchester into the UK's leading technical education city-region made it the perfect backdrop for our celebration of skills.

Our national finals show just how powerful the UK skills system can be when governments, business and education come together with a shared ambition.

From young people competing, to innovative CPD delivered with Ofsted and cutting-edge employers, to discussions with DfE, the Institute for Apprenticeships and Technical Education, and industry partners, we

explored how to develop an internationally competitive skills base.

Our national finals represent a chance to benchmark and celebrate the best in the

UK, but this needs to be an ongoing process. We must celebrate excellence but also provide a catalyst to develop it.

That is why we are using the insights we gain as a member of the 86-strong international WorldSkills network to develop new pedagogical techniques that meet employer needs.

We are embedding these in institutions across the UK through our Centre of Excellence, which

we run in partnership with NCFE.

Since its launch in 2020, our Centre of Excellence has benefited 4,500 educators and over 64,000 learners. The next phase of this programme is now open to all institutions across the UK.

I want to take

this opportunity to thank the thousands of teachers and trainers who make it possible for their students and apprentices to enter our competitions. Without your support and dedication and indeed the commitment from leaders, investment from employers and support from governments, our competitors would not be able to compete at the highest level. We are truly grateful for your ongoing support.

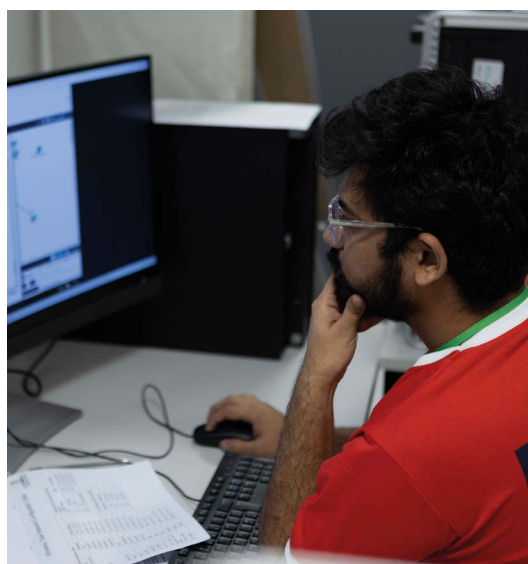

A special thank you goes to the institutions and partners that did such a fantastic job of hosting and delivering our national finals.

To all our finalists and medal winners, you are an inspiration to us all and living proof that the UK has the potential to be a world-class skills economy!

**BEN  
BLACKLEDGE**  
Chief executive,  
WorldSkills UK

Our national finals show just how powerful the UK skills system can be when governments, business and education come together

# Greater Manchester – the home of technical education

ANVIKSHA PATEL  
ANVIKSHA.PATEL@FEWEEK.CO.UK

Greater Manchester mayor Andy Burnham's ambition to create the UK's first "integrated technical education system" was put to the test as the city region's education and business communities united to host WorldSkills UK's 2023 national finals.

It's a place where technical education is "deeply embedded in the culture and history" according to Wigan and Leigh College principal Anna Dawe, whose college was founded in 1857 as a mining college.

Education providers have cultivated "fantastic relationships" with employers in the region, principals say.

"I think Manchester has got a really proud heritage of technical education and we're really fortunate here to have some fantastic colleges who are all committed to technical education," Rachel Curry, principal of one of the host institutions The Manchester College, told *FE Week*.

This commitment has been backed up by an excellent record in WorldSkills UK finalists and medal winners from the area.

More than 6,000 young people applied for the initial stage of the competition, with over a quarter of those coming from Greater Manchester.

Organising all of these competition finals across a network of training providers, colleges and a university showcased the city region's technical education community working together at their best.

Seven of the nine colleges in Greater Manchester had learners in this year's national finals and 13 local competitors even went on to win medals in their specialisms.

At EuroSkills Gdansk in September, the only gold medallist was Isabelle Barron, from Clitheroe, who works for global architects Chapman Taylor in Manchester.

Meanwhile, Trafford College has had the most WorldSkills UK registrations for a single UK college, across 27 skills and three foundation skills for the last two years, according to principal James Scott.

"This is because of the value we attach to the embedding of technical excellence across the curriculum and within our pedagogical practice," he explained.

And Tameside College welcomed back

Lucy Yelland and Ben Love, who won medallions of excellence for mechatronics at EuroSkills Gdansk.

The North West also has 16 institutions in the WorldSkills Centre of Excellence, the highest regional proportion across the country.

On top of all that, Mayor Andy Burnham regularly talks about wanting Greater Manchester to become the UK's first "integrated technical education system" and, this May, revealed his proposals to create a Greater Manchester Baccalaureate to sit alongside the government's EBacc.

"Designed to build resilience and self-confidence as well as honing technical and employability skills, the WorldSkills UK national finals supports our vision for technical education in our city-region by offering young people up-to-date opportunities that are led by industry need," Burnham said.

## Greater Manchester excellence

Over 400 students and apprentices descended upon Greater Manchester to compete in over 50 different skills competitions over three days for this year's UK national finals.

Competitors, training managers, families and members of the public were able to see technical excellence at the ten host FE colleges, universities, and independent training providers.

At a business brunch hosted by The Manchester College held during the finals, industry leaders came together to celebrate the talented young people and the skills they bring back to their employers.

"[The competition] is specific training for our finalists, which upskills them and also makes them more valuable when they go back on the shop floor for their own employers," said Richard Hutchins, competitions manager at The Institute of the Motor Industry (IMI).

"One of the things that WorldSkills UK does brilliantly is it tests us against the best and what it tells us, rather encouragingly, is that our best can compete with the best of the world," added Susan Acland-Hood, permanent secretary at the Department for Education.

"The challenge for us is how we try and make sure that we've got a system in which that best is not so exceptional."

Nearly 200 individual gold, silver and bronze medals were awarded at the national final ceremony at the end of the competition. Many will go on to train to become part of Squad UK for WorldSkills Shanghai 2026.

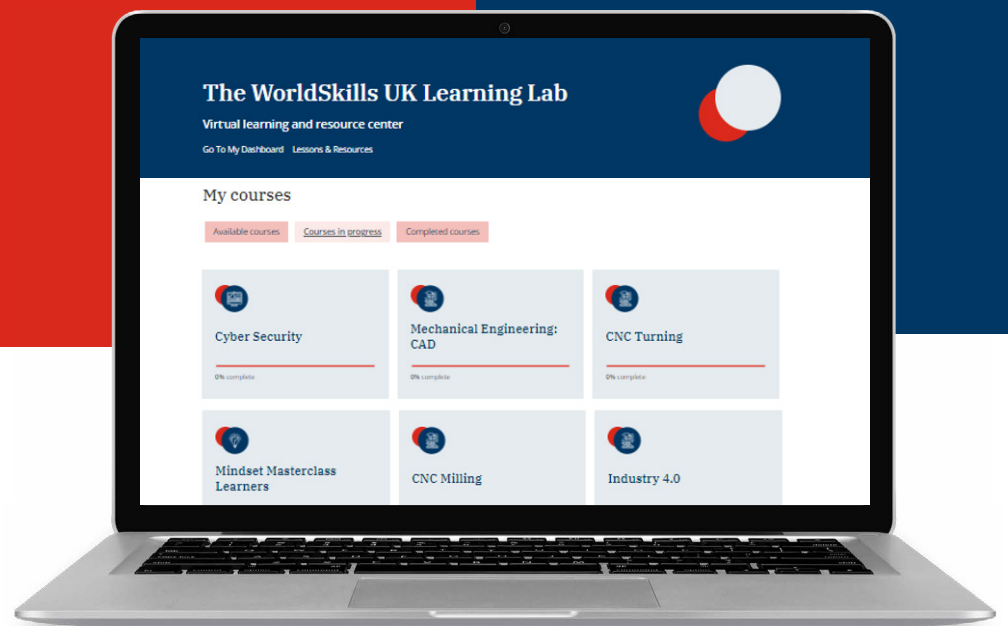

Cllr Eamonn O'Brien, Greater Manchester lead for technical education and skills

# International benchmarks raising standards at home

ANVIKSHA PATEL  
ANVIKSHA.PATEL@FEWEEK.CO.UK

**T**hough WorldSkills UK is celebrating home-grown technical skills excellence at the national finals in Greater Manchester this year, the success of competitors can be traced to knowledge and innovations from across the continent and beyond.

As WorldSkills UK themselves describe it, the organisation is the international arm of the UK skills system, meaning it can identify and utilise strengths in learning techniques from educators across the globe to upskill UK learners so they are ready to compete on an international level.

Of course, it goes the other way too. WorldSkills UK teams are taking innovations from educators and companies here in the UK and exporting them to other countries, helping them to develop their own competitors in skills that the UK is already excelling in.

“

**We can witness how those other nations are driving innovation in teaching and learning**

Parisa Shirazi, director of standards at WorldSkills UK is leading the charge to take international insights and mainstream them back into teaching and learning here at home.

“We can witness how those other nations are driving innovation in teaching and learning, and the richness of that data, that insight, but there wasn't really a formal method of how we can bring that back until now,” she told *FE Week*.

Michael McGuire, a WorldSkills UK training manager in digital construction skills, helped to develop the digital construction competition

in the UK and consequently worked abroad to help other countries develop their own.

“As we were one of the first ones, I supported other countries in launching and developing competitions in Poland, France, Germany, Austria and Ireland,” he said.

Because of the sharing of best practices and competing against other countries, McGuire said the competitors' skills were improving across the board. “We up their skills, they up their skills. Internationally, the projects have only got bigger,” he said.

Recently, McGuire took a UK competitor, Paul, to the French national finals, where he placed fourth.

“I would expect him to be better than that, but it shows you how the French have definitely upped their skill level and their competition.

“I was able to see that, plus their training and what they're using for their test projects, and I'm bringing that back as I wrote the UK national final [competition] this year,” he explained.

WorldSkills UK has been utilising its learning lab to implement lessons learned abroad.

The lab is an on-demand learning platform that provides teaching content but is underpinned by international best practices across a range of different specialisms.

The organisation will also be launching some new benchmarking tools on the learning lab next year across 27 different standards from cyber security to digital construction.

Teachers will have access to on-demand curriculum content and real-time benchmarking on how students and apprentices perform locally and nationwide.

These will be underpinned by the National Standards of Excellence – a UK-wide standardised measure of excellence – the first of its kind, the organisation claims.

McGuire said as part of the national standards, he will be sharing the actual digital construction competition project used at EuroSkills Gdańsk

– where the UK won a gold medal – with UK educators who can use it as a benchmark in their own teaching.

The national standards are essentially trying to bridge the gap between the international WorldSkills standards and our current national standards.

“The WorldSkills version is quite high-level. It's consulted on with industry and education globally and, arguably, is equivalent to like a level 5 [qualification],” Shirazi said.

“Those standards are then used to define the international competitions and the way that they're marked and judged.”

Shirazi explained that a level three learner might struggle to achieve the international occupational standard in their specialism, hence the need for an in-between goal for learners.

“[National Standards of Excellence] is basically going to be an additional asset or a tool that will be available from our WorldSkills UK learning lab that will sit alongside the different benchmarking tools,” she added.

# Employers launch new competition to close manufacturing skills gap

**ANVIKSHA PATEL**  
ANVIKSHA.PATEL@FEWEEK.CO.UK

**N**ot everyone can say they are single-handedly trying to close a skills gap in the UK.

But Steve Taylor might be one of them.

Taylor is a technical trainer at 3DGBIRE, the competition organising partner for the additive manufacturing competition at the WorldSkills UK national finals this year.

This is the first year that the competition is coming to the UK, having been run in other countries for several years.

Taylor approached WorldSkills UK just before the covid-19 lockdown was imposed in England in 2020 to propose bringing additive manufacturing to the competition stage to upskill young learners and address a need he had spotted in the industry.

"We saw in industry that they haven't got these particular skills to get the most out of the up-and-coming technologies," he told *FE Week*.

"The thing is, the technologies are changing so quickly, the demand is rising and the complexity [of the job] means that sometimes there's a reluctance to go for it just purely because they haven't got the skills," he added.

"This now is a way to be able to draw out and focus the skills that the industry and individuals are going to need."

Additive manufacturing encompasses multiple learning paths as it is not currently a standalone qualification. 3D printing is applied across several engineering and manufacturing T Levels for example.

This all-encompassing skills area is something that key figures in the Department for Education are keen on encouraging for the future workforce.

Susan Acland-Hood, permanent secretary at the Department for Education, said during the national finals, that a lot of innovation happens "in the intersection between disciplines."

"There's a really strong argument that the person of the future is a T-shaped person with a specialism but also a set of shoulders to broaden their knowledge," she said.

## High demand for additive manufacturing

The competition was greenlit when the pandemic subsided and this year, 3DGBIRE hosted a demonstration competition at the national finals.

The competition was held at the University of Salford, where competitors had to complete a design and 3D printing task over two days.

The initial stages of the competition drew in more applications than expected, Taylor said.

"We were thinking we might get 8-10 competitors to prove the concept, but we had around about 90 registrations for the competition."

The competitors were whittled down to eight finalists for the national final.

UTC Sheffield student Lucas Langley placed first in the demo competition, followed by NWTSF's Oscar McNaughton in second place and Eva Voma from GLLM in third.

A further three high-performing students were highly commended by competition judges; Henry Owen and Nicolae-Alexandru Popa, both also from UTC Sheffield and Jakub Strzelczyk of MTC.

Steve Cox, a 3D technology consultant and judge, said he was already seeing some tweaks

to make in next year's competition.

"It's getting the blend right between the creation of the part and then the additive manufacturing of the part," he told *FE Week*.

The competition tasks also must reflect real-life problems. The final test project asked participants to create a 3D-printed replacement for a broken part of a product.

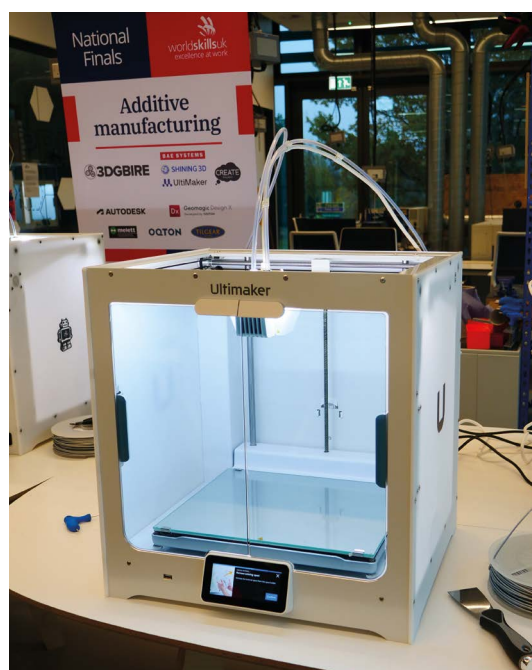

"I'm already involved with companies that are in some cases fixing domestic consumer appliances, using 3D printed parts because spare parts aren't available from the manufacturer," Cox added.

What is even more exciting for the sector is WorldSkills UK will be looking to select finalists to join Squad UK for WorldSkills Lyon, next year's global skills competition.

It will be the first time that additive manufacturing competitors will be competing for Team UK internationally.

The move is also part of WorldSkills UK's research into the UK falling short in manufacturing skills and its own pledge to aim for a top-ten finish in manufacturing and engineering at WorldSkills Shanghai 2026.

The WorldSkills UK Competition is delivered by 3DGBIRE and the Create Education Project with sponsorship from industry-leading companies: UltiMaker and Shining 3D.

Bronze: **Charlie Baird**, National Gas Transmission, Chester College  
Highly Commended: **Brandon Turton**, Benjamin Parsons, The Royal Engineers, Royal School of Military Engineering  
In partnership with **Air Products, BAE Systems, ENG EPA**

# Health, Hospitality and Lifestyle

## Beauty Therapist

Location: **Trafford College**  
Competition Organising Partner: **Coleg Cambria**  
Gold: **Neve Dunn**, Tyne Coast College  
Silver: **Kaya Mujica**, Pembrokeshire College  
Bronze: **Erin Owens**, Pembrokeshire College

## Beauty Therapy Practitioner

Location: **Trafford College**  
Competition Organising Partner: **Coleg Cambria**  
Gold: **Mykenzie Cartmill**, Southern Regional College  
Silver: **Carlie-Jayne Dutton**, Pembrokeshire College  
Bronze: **Amy Fairclough**, St Helen's College, SK Group  
Highly Commended: **Adrienne Chastney**, Tyne Coast College and **Beth Monro**, East Sussex College Group

## Commercial Make-up

Location: **Trafford College**  
Competition Organising Partner: **Coleg Cambria**  
Gold: **Keeley Mullan**, Riverside College  
Silver: **Natalie Godfrey**, Tameside College  
Bronze: **Crystal Palmer**, Wigan and Leigh College  
Highly Commended: **Becca Wilson**, Activate Learning

## Confectionery & Patisserie

Location: **The Manchester College**  
Competition Organising Partner: **Craft Guild of Chefs**  
Gold: **Zoe Wright**, City of Glasgow College  
Silver: **Chloe Gillespie**, City of Glasgow College  
Bronze: **Shirin Asl**, The Manchester College

## Creative Media Make-up

Location: **Trafford College**  
Competition Organising Partner: **Coleg Cambria**  
Gold: **Lydia Beavis**, Coleg Gwent  
Silver: **Laura James**, Coleg Gwent  
Bronze: **Flo Traini-Cobb**, Chichester College Group

## Culinary Arts

Location: **The Manchester College**  
Competition Organising Partner: **Craft Guild of Chefs**  
Gold: **Sophie Smith**, Ulster University  
Silver: **Georgia Hackett**, The City of Liverpool College  
Bronze: **Annabelle Hughes**, Southern Regional College  
Highly Commended: **Gabrielle Wilson**, NPTC Group

## Floristry

Location: **Trafford College**  
Competition Organising Partner: **British Floristry Association (BFA)**  
Gold: **Kirsty Noble**, The Floristry School Sheffield, Fresh Ideas Florist  
Silver: **Edel Michael**, CAFRE  
Bronze: **Emma Rochfort**, Warwickshire College Group  
Highly Commended: **Angela Wake**, East Durham College

## Foundation Skills: Catering

Location: **The Manchester College**  
Competition Organising Partner: **North Warwickshire & South Leicestershire College**  
Gold: **Sophie Trevitt**, North Warwickshire and South Leicestershire College  
Silver: **Kian Gill**, Weston College, **Matthew Simmons**, Elidyr Communities Trust, **Ethan Snell**, Elidyr Communities Trust  
Bronze: **Ashton Lewis**, North Warwickshire and South Leicestershire College

## Foundation Skills: Hairdressing

Location: **The Manchester College**  
Competition Organising Partner: **New College Durham**  
Gold: **Emalise Stanley**, Rotherham College  
Silver: **Melissa Wood**, Wirral Metropolitan College  
Bronze: **Norah Nwikonzor**, Salford City College

## Foundation Skills: Health and Social Care

Location: **Wigan & Leigh - Centre for Technical Skills**  
Competition Organising Partner: **ACTAN**  
Gold: **George Scully**, Pembrokeshire College  
Silver: **Daniel Lock**, Pembrokeshire College  
Bronze: **Sam Mannion**, North Warwickshire and South Leicestershire College, **Lily Holland**, The Oldham College

## Foundation Skills: Restaurant Services

Location: **The Manchester College**  
Competition Organising Partner: **New College Durham**  
Gold: **Keira Paterson**, North Warwickshire and South Leicestershire College  
Silver: **Ester James**, Cheshire College South & West  
Bronze: **Lucy-Ann Gibson**, New City College

## Foundation Skills: Media

Location: **The Manchester College**  
Competition Organising Partner: **North Warwickshire & South Leicestershire College**  
Gold: **Lee Barnett**, **William Clark**, **Jade Oakley**, SLCT1, North Warwickshire and South Leicestershire College  
Silver: **Jolsna Jestin**, **Maisie Blackwell**, Sunderland College Team 2, Sunderland College  
Bronze: **Rhys McCann**, **Izzabella Hughes**, Met Productions, Wirral Metropolitan College

## Hairdressing

Location: **Trafford College**  
Competition Organising Partner: **L'Oreal Professional**  
Gold: **Dion Archer**, The College Merthyr Tydfil  
Silver: **Theresa Hayes**, Coleg Gwent  
Bronze: **Amelia Higgins**, Dudley College, **Dy8 Desinz**  
Highly Commended: **Holly Whitehouse**, Grwp Llandrillo Menai

## Health & Social Care

Location: **Wigan & Leigh - Centre for Technical Skills**  
Competition Organising Partner: **ACTAN**  
Gold: **Molly Hewitt**, The College of West Anglia  
Silver: **Hannah Hillis**, Southern Regional College  
Bronze: **Kimberley Jones**, Boston College  
Highly Commended: **Abigail Clarkson**, Boston College

## Nail Technician

Location: **Trafford College**  
Competition Organising Partner: **Coleg Cambria**  
Gold: **Daniela Mikute**, Hull College  
Silver: **Amy Martin**, Trafford College Group  
Bronze: **Summer Corcoran**, Wigan and Leigh College  
Highly Commended: **Ellie-Mae Bracknell**, Walsall College

## Restaurant Service

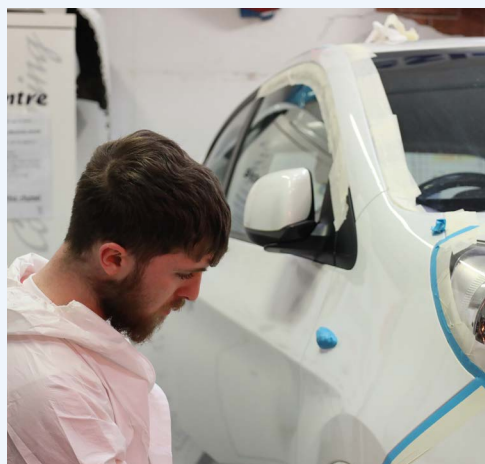

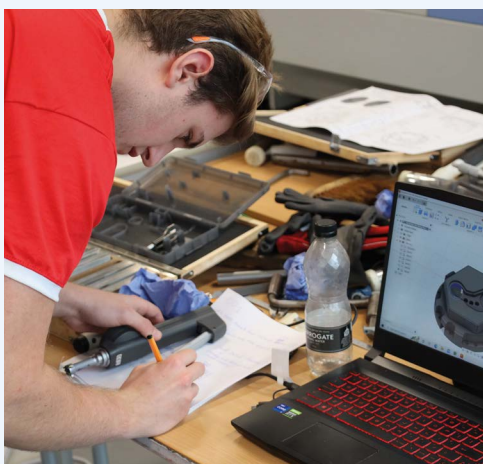

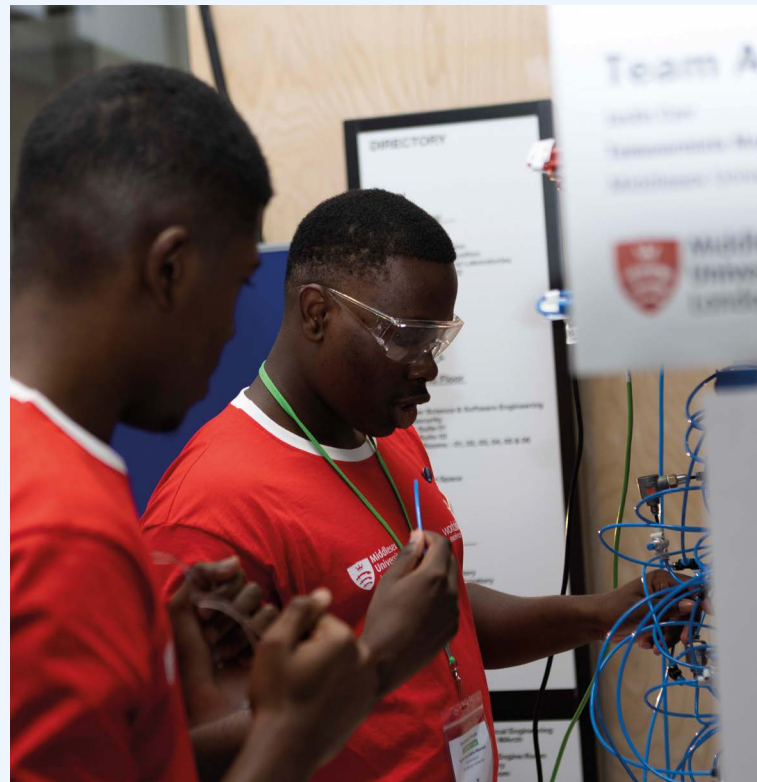

Location: **The Manchester College**  
Competition Organising Partner: **Craft Guild of Chefs**  
Gold: **Yuliia Batrak**, Grwp Llandrillo Menai  
Silver: **Ella Clements**, Coleg Sir Gar / Coleg Ceredigion  
Bronze: **Katy Law**, Coleg Sir Gar / Coleg Ceredigion  
Highly Commended: **Grace Young**, Pembrokeshire College and **Emily Keane**, Coleg Sir Gar / Coleg Ceredigion

Zoe Wright, City of Glasgow College

# Centre of Excellence programme goes from strength to strength

ANVIKSHA PATEL  
ANVIKSHA.PATEL@FEWEEK.CO.UK

**W**hen WorldSkills UK launched the Centre of Excellence pilot in 2020, the organisation had no idea it would be so popular.

It received over 55 applications from education institutions that wanted to take part in free world-class teacher training and access a network of best practice and international thought leadership.

The three-year pilot, which was developed with NCFE, was initially capped at 20 participating institutions to engage in the programme but ended up accepting 50 organisations to take part.

Since then, over 64,000 learners have benefitted from the Centre of Excellence, exceeding an initial target of 42,000 learners and has reached 4,000 teaching practitioners.

The pilot was a hit, and in June this year, WorldSkills UK announced that applications were open to all training organisations, including colleges, training providers, Institutes of Technology and universities, that wanted to take part.

Over 85 organisations are now registered members and the number is set to grow.

Firebrand Training was the first independent training provider to be accepted onto the programme.

For Firebrand's managing director for apprenticeships Ben Hansford, the appeal was giving his educators "the opportunity to go from really high levels of competence to world-class."

Firebrand has also embedded WorldSkills UK components into its curriculum.

"Our data apprenticeships have pressure testing in them now, which actually is over and above the requirements for an apprenticeship," Hansford said. "It gives individuals the chance to demonstrate their skills in a pressured environment, which aligns with WorldSkills competitions as well."

For learners, the programme has also made its

mark. For the second year running now, Firebrand has posted a 73 per cent qualification achievement rate across all 13 of its apprenticeship standards.

"Learners are experiencing enriched programmes, ultimately from world-class educators," Hansford added. "That goes on to have a much better impact on employers, the economy, the sector, and these well-rounded individuals are going on to have amazing careers."

The roll-out meant that more than 140,000 young people and nearly 5,000 educators can now access support and development opportunities. WorldSkills UK enlisted the support of two new Centre of Excellence supporting organisations too: Autodesk and Skills and Education Group.

The North West – the home of the 2023 WorldSkills UK national finals – is uniquely benefiting from the programme.

The region has the most institutions in the Centre of Excellence programme so far with 16 of the 67 fully signed up, followed by the West Midlands with nine. Other regions have some catching up to do.

London has just three participating training organisations currently making use of the free resources and opportunities through the Centre of Excellence. In the East Midlands, just one college is currently fully registered.

But the numbers are growing. A further 21 UK training organisations are currently being onboarded.

Parisa Shirazi, WorldSkills UK director of standards told *FE Week* that Greater Manchester being the "playground" for the national finals was an inspiration to its involvement in the Centre of Excellence.

"I think it's an embedded culture of competition firstly," she said.

Shirazi explained that the Greater Manchester Colleges Group, the membership body for local colleges, organise their own intercollegiate competitions, "not specifically for WorldSkills UK, but because they see the real value in driving performance of young people," she said.

The expansion of the programme means what's on offer for teachers and trainers is also developing.

## Current onboarded WorldSkills UK Centre for Excellence institutions (Nov 2023)

NATION/ENGLISH REGION	CURRENT PARTICIPANTS
North West	16
West Midlands	9
North East	8
Yorkshire and The Humber	8
East of England	7
Wales	6
South West	4
South East	4
London	3
Northern Ireland	1
East Midlands	1

This includes a combination of in-person and virtual CPD delivery. "We're trying to make sure the programme is as accessible as possible, and recognise the time constraints of teachers," Shirazi said.

It also comprises a revamped network of innovation or "a third space", Shirazi says, for like-minded practitioners to discuss upskilling in key growth sectors for the economy such as green skills, digital and advanced manufacturing.

The third strand offers global thought leadership to college principals, training providers CEOs and employer education leaders who can share "challenges and solutions" with UK and international partners.

# Are you committed to equity, diversity and inclusion? Is your organisation?

In partnership with

EDI is crucially important in education and employment, giving young people from all backgrounds access to life and career opportunities.

Help us to honour and celebrate the outstanding achievements of those who have gone above and beyond in their commitment to EDI.
